

Community Partnerships

Resource Map Directory Worksheet

Purpose

Once you have identified local providers using the Economic Empowerment National Resource Directory, use this worksheet to document information about local providers. This list can be utilized to make participant referrals and to identify potential strategic partners.

Instructions

Step 1. Fill out the “Resource Map” sheet. Populate this sheet with names of all the local organizations that offer services across each category. These provider names can be those of existing referral partners and new organizations identified through the **Economic Empowerment National Resource Directory** or other online sources. Add provider names in the “resource map” sheet into the “resource directory” sheet.

Step 2. Fill out the “Resource Directory” sheet. Populate the “resource directory” sheet with missing information for each provider. Make sure all organizations have been contacted for updated information. Ideally, this activity should be conducted at least annually, as resource availability can change over time.

Step 3. Use this workbook to quickly identify local providers, coordinate warm handoffs, and track partnerships.

Who is this resource for?

This resource is for organization and/or program leaders administering economic empowerment programs, and program staff who provide direct services. It may be useful in both crisis intervention and long-term services.
